

Risk Assessment: Hypothetical Regional Maritime Logistics Company - Wenatchee, WA

Organization Profile

A small logistics company based in Wenatchee, WA, coordinating cargo transfers and vendor communications along the Columbia River corridor. The company relies on cloud-based scheduling, regional transport partnerships, and remote communications with dockside teams and suppliers.

Key Assets

Asset	Description
Operations Center Network	Local workstations, servers, Wi-Fi, and VoIP systems
Cloud-Based Scheduling Platform	Cargo manifests, delivery timelines, vendor coordination
Employee Devices	Laptops and mobile phones used for remote access
Vendor & Client Data	Contracts, billing, and communications stored in cloud apps
Regional Transport Interfaces	APIs and portals used to coordinate with third-party carriers and port authorities

Threats

Threat	Impact
Phishing Attacks	Credential theft, unauthorized access to cloud systems
Ransomware	Disruption of scheduling and vendor communications
Insider Misuse	Unintentional data leaks or sabotage
API Exploits	Vulnerabilities in third-party transport coordination tools
Physical Theft	Loss of devices with sensitive data during field operations
Unpatched Services	Exploitable for lateral movement or data exfiltration

Controls:

Control	Purpose
MFA on Cloud Services	Prevent unauthorized access from phishing or stolen credentials
Endpoint Protection	Detect and block malware on employee devices
Network Segmentation	Isolate sensitive systems from public-facing services
Patch Management	Address known vulnerabilities in local and cloud systems
Security Awareness Training	Reduce phishing success and insider risk
Encrypted Backups	Ensure recoverability from ransomware or data loss

Risk Summary

This Wenatchee-based logistics company faces moderate cyber risk due to its reliance on cloud systems, third-party transport interfaces, and remote access. Controls should prioritize authentication, vendor security, and employee awareness to reduce exposure to phishing, ransomware, and coordination tool vulnerabilities.
